**COMPLAINT**

1. Jurisdiction in this case is based on:

- ☐ Diversity (none of the defendants are residents of the state where plaintiff is a resident)
- ☒ Federal question (suit is based upon a federal statute or provision of the United States Constitution)
- ☒ Other (explain) amount of my surgery amounting to  
at least \$ 50,000 if not more. It is a guess as  
to price estimate and for that purpose alone.

2. The facts of this case are:

that pharyngitis and pharyngonal  
conditions were carelessly ignored.  
pharyngitis can be life threatening left untreated  
as noted in my attached complaint.  
Not to mention it's effect on my type 2 diabetes  
control and management. My death could've  
resulted as a result of their intended neglect  
and carelessness.

Sincerely,  
Tonia Baker

3. The relief I want the court to order is:

- ☒ Damages in the amount of: \$50,000 or more to cover my surgery
- ☒ An injunction ordering: that these neglectful employees be  
court ordered to pay for my surgery -
- ☐ Other (explain) and that those neglectful employees be  
court ordered to pay for it.

CLERK'S OFFICE

AT BALTIMORE

DEPUTY

El Tonia ~~Baker~~ am filing and pursuing  
Criminal ~~by~~ <sup>Intelligence</sup> lawsuit proceedings  
against Mercy Medical Center for the following  
medical conditions which were maliciously  
and ignorantly ignored:

pharyngitis - inflammation of the mucous  
membrane of the throat also known as pharynx  
Sore throat swelling which almost has my  
throat swollen shut. my pharynx which is the  
cavity at the back of the mouth where the passage  
of the nose, lungs, and stomach begin therefore  
life threatening conditions can and do often exist  
in other cases scenarios.

pharyngeal tonsils - inflammation of mucous  
membrane in children as well as adults known  
as adenoids. abnormal enlargement of tonsils  
a mass of lymphoid glandular tissue at the  
back of the (throat) pharynx.

pharyngeal ~~nasal~~ - having to do with the  
pharynx and the nose. (Both)

nasal congestion in children as well as adults  
has caused chronic sleep apnea with insufficient  
oxygen levels. (hypoxemia)

hypoxemia - a low or deficient oxygen level in  
the blood which leads to heart attack or stroke.

4/27/12

as a result of such patient malpractice neglect a death could've and would've resulted therefore in my complaint I am requesting the following relief:

1) That surgery be scheduled as well as conducted by licensed qualified practitioner(s) on their grounds meaning hospital or I can and will be transferred as well as ambulated to another facility with full medical assistance coverage under my Maryland Physician's Care as supported by hospital policy.

2) That I be compensated in the amount of my surgery by the neglectful physicians at Mercy Medical Center and Chief of staff allowing this discrimination to have taken place on their hospital grounds.

3) That those employees be expected to attend patient neglect meetings in a means of prevention there of further lawsuits taking place as a result.

4) That those neglectful employees be expected to receive a pay cut as a result of their patient neglect practices.

5) That all relief be deemed hopefully and considerably reasonable under the laws of this state

4/27/12

6) I did not ask for employee firings out of compassionate kindness because of course I know they have families to care for as well as I.

7) My surgery should and could amount to at least 50,000 if not more and of course I am guessing just for estimate purposes.

Thank you most kindly  
and sincerely,

Tania Baker
